SUMMARY

Experienced Frontend Developer with 4 years of experience and a master degree in Computer Science. Expert in Angular with experience in web and mobile application development using Ionic Framework. Skilled in Node.js, ExpressJS, HTML, CSS, Automated Testing and Agile methodologies.

EXPERIENCE

Frontend Developer

BANKSApi Technology GmbH

📅 02/2023 - Present 📍 Munich, Germany

- Working on the product **Finhome** which provides the financial solution to customers with a centralized platform to manage one's insurance and bank entities.
- Responsible for writing new scalable features which are always maintained through Unit Tests with a minimum 80% statement and branch coverage.
- Collaborating with the Backend Engineers and the Product Manager for the Feature Planning, design and development sessions.
- Taking participation in the mobile application releases on the Play store and App Store and have been responsible for 3 releases so far.

Software Engineer II

Cloudera Hungary Kft.

📅 07/2020 - 02/2023 📍 Budapest, Hungary

- Worked on the Cloudera Data Platform, where I contributed to the Management Console, which is responsible for provisioning and maintaining the environment, Datalake, and Datahub clusters using different cloud providers like GCP, AWS and Azure.
- Developed new frontend features and fixed bugs caused in the development and production environment.
- Created and used the shared components and custom form controls throughout the project, reducing the redundant code by around 10%.
- Dealt with the legacy codebase, refactored several components to make it consistent for the new features, and integrated Java services with my UI component.
- Reviewed codes from my peers, adding more than 330 new contributions to github. Also participated in planning meetings for the upcoming sprints, and retrospective meetings.

Software Engineer Intern

Cloudera Hungary Kft.

📅 07/2019 - 07/2020 📍 Cloudera, Hungary

- Wrote clean code for the project Apache Metron with a focus on the maintainability and scalability of the application through the unit and integration test coverages.
- Creating components and services for the feature and covering the Unit Tests and Integration test for the feature, keeping the test coverage to 85%.
- Writing mock APIs in the NodeJS using expressJS for testing the UI feature in absence of real API.
- Reviewing Pull requests, attending the stand-ups, sprint planning sessions and retrospective meetings.

SKILLS

Angular	Javascript	Typescript

Ionic Jasmine Karma

Unit Testing Integration Testing

Cypress ExpressJS NodeJS RxJS

NgRx Capacitor Cordova

Redux State Management

HTML CSS SASS SCSS

AngularJS REST Material Design

Bootstrap ReactJS

Docker AWS Marbles Testing

Github Gitlab End-to-end Testing

Jenkins Front-end CI/CD

EDUCATION

M.Sc. in Computer Science

ELTE

📅 09/2018 - 06/2020
📍 Budapest, Hungary

GPA **4.25** / 5.0

- Data Science specialization with Web Development, Database and Software engineering.

B.Tech. in Computer Science

SHUATS

📅 09/2013 - 06/2017
📍 Allahabad, India

GPA **9.2** / 10

- Software Engineering, Data Structure, Algorithms, Database Management, Mathematics
